

INSTRUCTION

Digital Resources

The Central Kitsap School District Board of Directors recognizes that an effective public education system develops students who are globally aware, civically engaged, and capable of managing their lives and careers. The Board also believes that students need to be proficient and safe users of information, media, and technology to succeed in a digital world.

Digital Resources are a powerful and compelling means to transform the way students learn and apply skills in relevant and rigorous ways. It is the District's goal for students to use technology for important purposes in schools, just as individuals in workplaces and other real-life settings. The District's Digital Resources are intended to help enable educators and students to communicate, share, collaborate and create, to think and solve problems, to manage their work and to take ownership of their lives.

Digital Citizenship and Safety

To help support student safety and citizenship in online activities, all students and staff will be educated about appropriate behavior. This includes social networking and other online communications, and cyberbullying awareness and response. All student internet access through the District network will be filtered.

The use of District Digital Resources is a privilege. Any inappropriate use of the District's Digital Resources by students and staff may result in the loss of, or limitations in access to, continued use of Digital Resources, and/or appropriate disciplinary action(s). In the case of District employees, disciplinary action may include termination of the employment relationship.

The superintendent or designee will be responsible for the creation and provision of comprehensive Digital Citizenship and Safety training. The superintendent or designee will also create strong digital educational systems that support innovative teaching and learning, provide appropriate staff development opportunities and develop procedures to support this policy.
