

COMMUNITY RELATIONS

Social Media

Central Kitsap School District recognizes that social media is a tool that can be used to promote and enhance its education and communication goals. The District acknowledges that many existing laws and policies apply to social-media use by District staff, students, and the public. This includes but is not limited to laws and policies in the areas of civility, privacy, public records retention and disclosure, copyright, ballot measures, access to District resources, and First Amendment rights. The District will comply with these laws and update its existing policies and procedures in these areas to address appropriate use of social media within the District.
