Student Academic Achievement Activity Support

Schools planning to participate in school-sponsored activities will provide such plans to the administration in the fall of each school year.

If these activities will lead to regional or national participation, a plan for raising half of the projected funds must be presented for approval.

In the event of budget reductions such participation may have to be limited during the year.

This policy excludes co-curricular activities.

Associated Student Body support is encouraged at the building level in supporting regional and national competition.

All activities requests will be screened against those activities approved by the National Association of Secondary School Principals, Student Activities Approved Program, and placed on a listing each year.
